Teos Marina E-Magazine will now be on children's radar with entertaining articles, intriguing and informative topics!

Message from CMM

FARUK GÜNLÜ

Teos Marina General Manager

Dear fellow sailors,

We had a great summer with you this summer. Every part of our marina was lively thanks to you. We observed that the boats staying in our marina are used very intensively, with 400-450 boat movements per day. Our sunbathing platform was full, especially on weekends. We had yachtsmen waiting for golf carts at Dream Stop. Our sanitary units were as clean as ever, despite heavy use. The streets of our bazaar hosted many visitors, especially in the evening hours. There were times when there was a row of swings in our playground. There were moments when we pushed the capacity limits of our parking lots. Even though we experienced some short-term service delays due to busyness, we had a very nice, energetic summer with you.

I hope you could relieve the tiredness of the whole year and found peace in Siğacık. Also, hope that you could be filled with energy at the live music venues in our marina. You may have cooled off in the cool waters of Siğacık. Especially this summer, I heard very nice memories from our boat owners who spent the night in Siğacık bays, where our bays were quiet, calm and peaceful at night. In August, the number of our yachtsmen who watched the meteor shower on their boats in a deserted bay was quite high. The weather is hot during the day in September. In the evenings, it is ideal for long dinners with its sweet coolness. Tables with arugula and fish at Deniz Restaurant, facing the marina view, are the favorites of many yachtsmen.

Some of our boat owners brought their fun to their boats throughout the summer. Especially our yachtsmen staying in the canal area are among those who extend the fun with live music coming from Sherlock. From time to time, we encountered issues such as noise and music in the marina that would disturb the peace of the neighbors, and we intervened immediately. Since we care about the peace of all citizens in our marina, we take all kinds of precautions, even up to termination of the mooring contracts, for those that cause disruption of peace.

This summer, some damages occurred due to the speed of the boats that sailed and returned from the cruise or during maneuvers. I hope that this issue will be made more sensitive to all our marina residents.

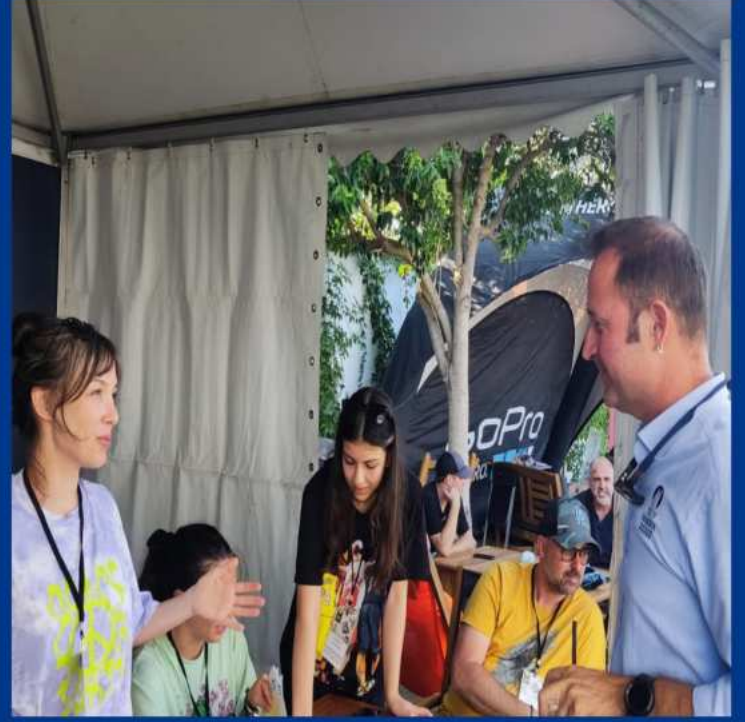

We hosted thousands of music enthusiasts at the concerts we held in our marina this summer. Birsen TEZER, Jehan BARBUR, Sena ŞENER and Dolce Band took the stage in our series of Teos Marina Bazaar Concerts, which started with the Sunshine Band. At the season finale concert we hosted Evrencan GÜNDÜZ and the entire festival area was once again filled to capacity. Influenced by the energy of all of you, we have already made an agreement with Evrencan GÜNDÜZ for 2024 summer concerts on Thursday, 20 June 2024 at 21:30.

This summer, we organized two concerts exclusively for our yachtsmen in our marina. In the first one, we listened to classical works that have not died for years under the light of the moon, spreading out on the cushions in the Garden of Eden with the Aegean String Quartet, which consists of artists who are members of the Izmir Symphony Orchestra. In the second one, we had unforgettable moments with Sibel EMEK in the jazz quartet. Jazz rhythms with Sibel EMEK's silky voice felt like a summer breeze to our souls. Those who came enjoyed those special moments to the fullest, but for those who missed both concerts, it is truly a great loss.

With its lush green gardens and spacious streets smelling of the sea, our Teos Marina Bazaar hosts thousands of visitors every day. Offering a wide range of services to its visitors from food & beverage to boutiques, souvenirs, live music venues to nightclubs, Teos Marina Bazaar is sweetened even more with Bolulu Hasan Usta, which opened next to the clock tower after Yomumu Frozen yogurt and Waffle Shop Akın. Now you have a new address to go to when you're craving something sweet.

Although there are only a few days left until the opening of the fishing season, many of our yachtsmen have already enjoyed fishing during the summer months. Siğacık Bay is a very productive area for amateur fishermen. It is generally not possible to return empty-handed, but for those who are not lucky enough, it is always possible to find fresh fish daily at Siğacık Fish Auction.

We have already completed our preliminary preparations for the Tuna Masters Teos, which is hosted by our marina every year in September. Let's see which of the master fishermen will bring the biggest fish this year?

Summer months with sea, sand and sun were very enjoyable. However, like cicadas, we did not sit back during the season. We checked and renewed the vault chains, locks and ropes. On stormy winter days, while you are in the warmth of your home, we will be performing routine checks to ensure your boats stay safely. When you leave your boat as of September; We kindly request that you tie up items such as cushions and boots that may fly on your boat, tie off the boat sails, tape the covers of navigational electronics, secure items that may fly or make noise in the wind, tie adequate fenders, and especially not leave any items on the pier.

I would like you to know that our mooring team will collect all your belongings such as boats, anchors, chains, canoes, chairs, buckets, etc. left on the pier without warning. Our mooring team collects the flying mats, fenders, etc. from the boats from the sea surface or bottom and keeps them in order to find the owner. We also keep items forgotten in sanitary units, golf vehicles or bicycles to find their owners. For all your forgotten belongings, please contact our front office team.

On the other hand, the maintenance of our Travel Lift has been completed. We are ready with our experienced technical workshops for boats that will spend the winter on land. I recommend that you contact our technical workshops in advance to plan the maintenance and repairs of your boat so that the maintenance and repairs of your boat can be carried out easily without having to squeeze in pre-season time. Before the season, due to the intensity of both the workshops and the intensity of our lift, there may be undesirable delays in your planned sea holiday.

This year, we offer a 40% discount on accommodation for your winter stay, whether at sea or on land. Our sea reservations are almost full. I recommend that you make your lift reservations without wasting time in order to stay safely on the steel credits on land. There is always room for every boat and every sailor at Teos Marina. Solution-oriented quality service is always our priority. After the pandemic and tsunami, which we have successfully overcome with our ability to take quick action and produce innovative solutions to the needs of our yachtsmen, we care about the comfort, safety and health of our yachtsmen, and continue to maximize the pleasure our yachtsmen will get from marina life by providing quality and comfortable professional marinating services with our competent staff. Our boat owners can rest assured that we will make every effort to stay safely and maintain 100% quality and satisfaction level in the 2023 winter season.

You can contact our magazine editor Pinar EREN at pinar.eren@teosmarina.com to suggest different content that you would like to see in our next issues or to advertise in these publications.

We take care not to fill your e-mail boxes with too many announcements or informative e-mails. That's why I invite you to follow our social media accounts to follow the announcement or the developments in our region.

We still have a few months to enjoy the summer days from time to time. Pleasure beckons you at Teos Marina during the autumn months, too. Immerse yourself in the healing waters of the sea at the first opportunity.

My team and I wish you all a peaceful and enjoyable autumn.

FARUK GÜNLÜ

Maritime History Routes and Monuments to Visit in the Footsteps of Important Names

Maritime can be considered one of the most important discovery and development processes in human history. Brave sailors have accomplished dazzling feats throughout history as they explored the seas, reached new lands and established trade routes. There are many tours and monuments in different parts of the world to pay respect to these heroes of maritime history and their legacy. Let's explore together some unforgettable routes and monuments where you can trace important names in maritime history.

1. *Kristof Kolomb – Cádiz, Spain*

Cádiz's name and reputation have forever been associated with maritime adventures. Christopher Columbus set out on two of his famous four voyages to the New World in 1492 from this ancient port city, strikingly situated on a landmass surrounded by sea on three sides.

Located in Cádiz, Spain, the Christopher Columbus Monument is an impressive statue honoring the sailor. You can also visit the Port of Cádiz, where Christopher Columbus set out for the American continent, and feel the atmosphere of this historical city.

2. *Vasco da Gama – Lisbon, Portugal*

Portuguese sailor Vasco da Gama, who lived in the Age of Discovery, was one of Europe's most successful explorers, and was known as the first person to leave Europe and go directly to India. He managed to reach India by sea in 1498 and became a famous sailor. In the city of Lisbon, which hosts his discoveries and achievements, the Jerónimos Monastery, where Vasco da Gama's tomb is located, and the monuments in the Baixa Pombalina region still keep the memory of this great sailor alive today.

3. *James Cook – Great Ocean Route*

British sailor James Cook, who is especially famous for his voyages in the Pacific Ocean and the island discoveries he made during these voyages, made discoveries in the Pacific Ocean in the 18th century. By following the Pacific Ocean route that Cook sailed, you can visit regions such as Australia, New Zealand, Tahiti and Hawaii, and witness the venerable memories of maritime history by tracing the traces of his discoveries. Although it is not related to the subject, let us add here the information that Cook's niece Tahora is married to the famous Ottoman religious scholar Ebubekir Efendi.

4. Ferdinand Magellan – Explorers Monument, Lisbon

Ferdinand Magellan, a Portuguese captain and explorer who became the first person to circumnavigate the world with his friend Juan Sebastián Elcano, with whom he organized an expedition to the East Indies from 1519 to 1522, is the sailor who led the first expedition to circumnavigate the world. The Strait of Magellan, which connects South America with the fireball Southern Ocean, is marked with a monument named after him. By visiting this monument in Lisbon, you can also get to know other mathematicians, clerics and cartographers who contributed to Magellan's unforgettable voyages in maritime history.

5. Zheng He – Nanjing, China

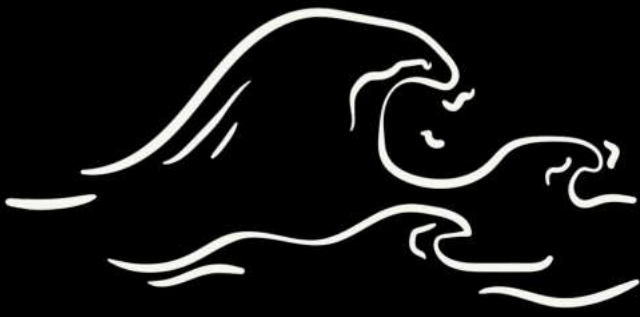

Zheng He, a 15th-century Chinese sailor and explorer who was known for leading large-scale exploration and trade expeditions in the world's seas, especially as the leader of the Great Ming Navy, is still remembered with respect today in the city of Nanjing, where the Great Surveillance and Government Buildings are located. Zheng He traveled with huge fleets to India, the Arabian Peninsula, and East Africa. These historical sites in Nanjing shed light on Chinese maritime history.

Piri Reis, Ottoman Empire

Piri Reis is one of the important figures of Turkish maritime and cartography. The most famous work of Piri Reis, known as an Ottoman admiral, cartographer and explorer who lived in the 16th century, "Kitab-ı Bahriye" has survived to this day as a maritime guide and atlas containing the maritime wonders of that period. This work, which contains detailed maps of the Mediterranean and its surroundings, has become a very important resource for sailors. On the world map he drew in 1513, the state of some parts of America before its discovery by Europeans can be seen. The map exhibited in Topkapı Palace today is a great treasure for researchers.

Maritime Themed Museums

*Are
Everywhere*

Maritime history has been the key to both discovery and trade for humanity. This encompassing and fascinating history comes alive today in maritime museums around the world. These museums offer visitors various topics, from shipbuilding technologies to the stories of legendary sailors, from sea battles to ancient maritime culture, with their rich collections and interactive exhibitions.

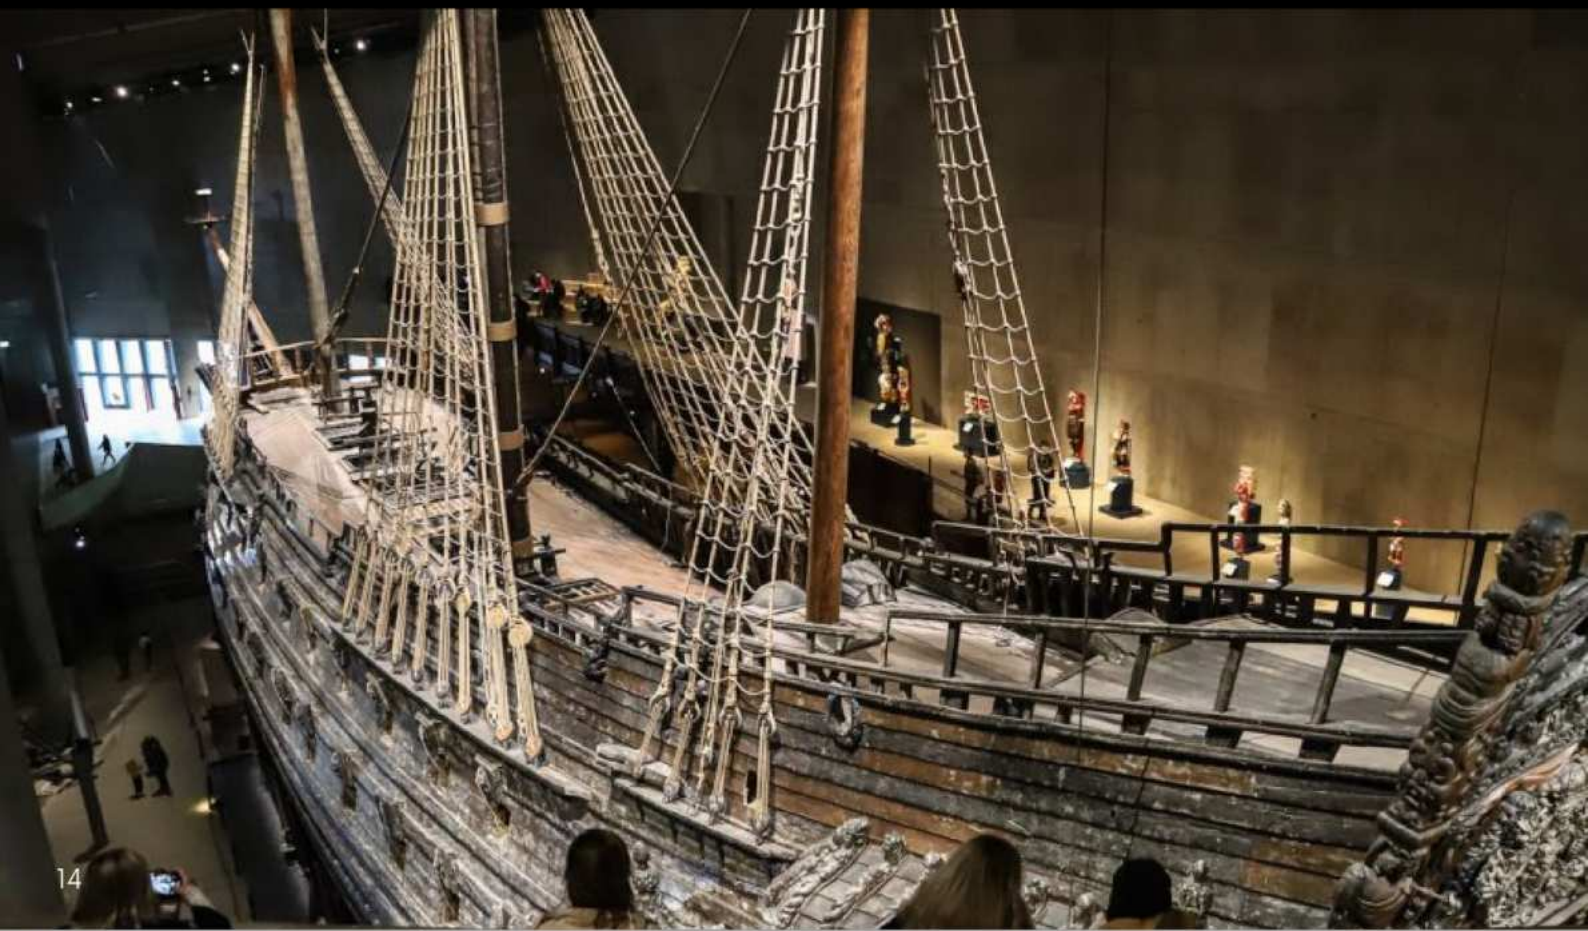

Vasa Museum

Stockholm, Sweden

The ship named Vasa capsized and sank in Stockholm on its first voyage in 1628. After 333 years on the seabed, this massive warship was rescued and its voyage was able to continue. Today, Vasa is the world's most beautifully preserved 17th-century ship and can be seen in a specially built museum in Stockholm. Vasa is a unique art treasure. 98 percent of the ship consists of original parts and hundreds of carved sculptures.

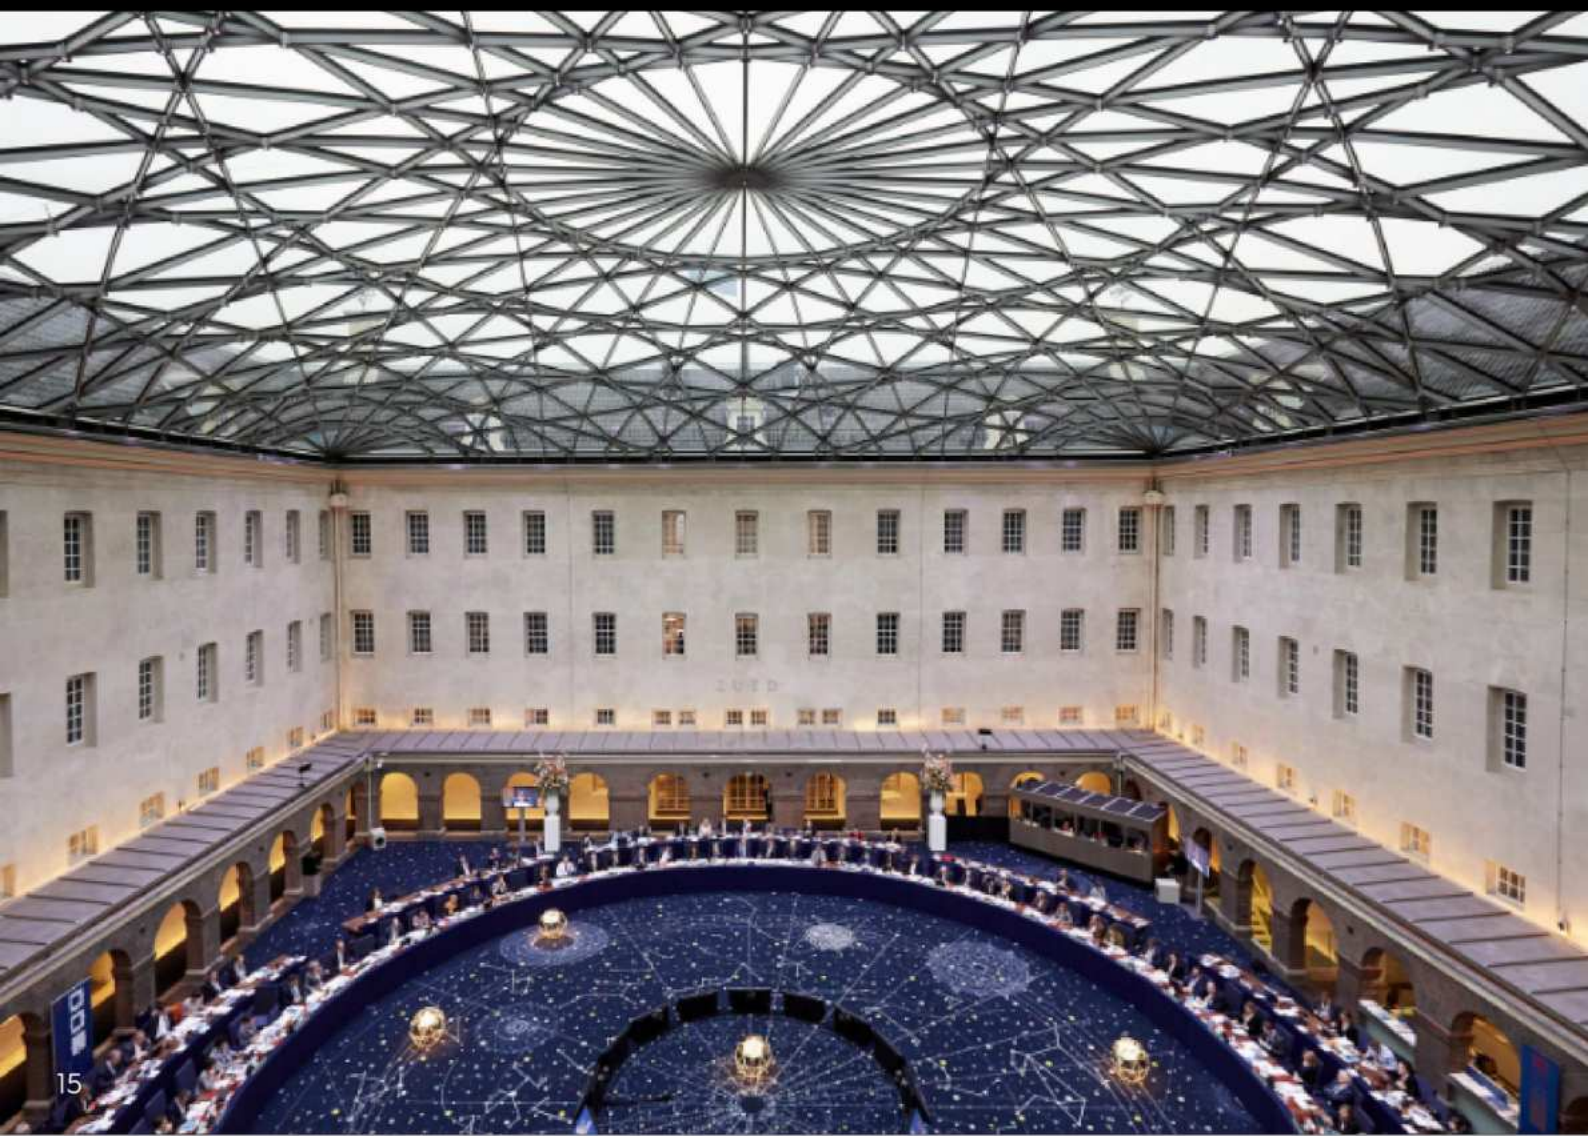

Besides the ship itself, the Vasa Museum houses various exhibits that introduce Vasa's short but also very long history. The museum also has a well-equipped shop and a trendy restaurant serving both light lunches and pastries as well as a variety of dishes. Guided tours in English are offered several times a day. The museum also has audio guides in many different languages. The film about Vasa and the children's film "The Vasa Piglet" are shown daily at the museum in several languages.

Maritime Museum

*Amsterdam,
Holland*

The Amsterdam Maritime Museum, which also exhibits Turkish-image ship helm figures, was established in a place known as 'Lands Zeemagazijn', a warehouse building built in 1656 and located in the harbor area of Amsterdam. This building was used to store supplies for naval expeditions in the Dutch East Indies and West Indies. It was opened to the public as a museum in 1973. Amsterdam Maritime Museum has a comprehensive collection of shipbuilding, exploration and maritime trade. The museum hosts a wealth of exhibits on ship models used in the 17th century, navigation instruments and the daily life of sailors.

Maritime Museum

Greenwich, England

Greenwich Maritime Museum is one of the most important museums in London, offering a unique treasure for those who want to trace maritime history and maritime discoveries. This museum houses an extensive collection that honors Britain's maritime heritage and tells visitors about the discovery-filled adventure of the world's seas.

The museum is located in an area that also includes the Royal Observatory in Greenwich. This region is also considered the center of Greenwich Mean Time (GMT). The building, called Flamsteed House, serves as the reference point for GMT. The museum also offers visitors an engaging experience explaining how GMT is determined and used here.

Mystic Seaport Museum

Connecticut, USA

The Mystic Seaport Museum is a large open-air museum in Mystic, Connecticut, United States, that showcases maritime history, culture, and life associated with the sea. It is also known as the "Museum of Maritime History and Maritime Life". Mystic Seaport offers visitors the opportunity to explore different aspects of the maritime world through real ships, historic buildings, maritime collections and interactive exhibits, while also presenting nautical collections along with many original and restored structures to revive and preserve 19th century maritime life and commerce.

Istanbul Maritime Museum

Istanbul, Türkiye

Istanbul Maritime Museum is Turkey's largest maritime museum and one of the world's leading museums in terms of the diversity of its collections. The Istanbul Naval Museum, which is affiliated with the Naval Forces Command and has approximately 20,000 artifacts in its collection, is also the first military museum established in Turkey. The museum, which has a rich collection of maritime history from the Ottoman Empire to the present day, includes Ottoman period ship models, nautical charts, maritime instruments and exhibits on ancient maritime culture.

Maritiman Museum

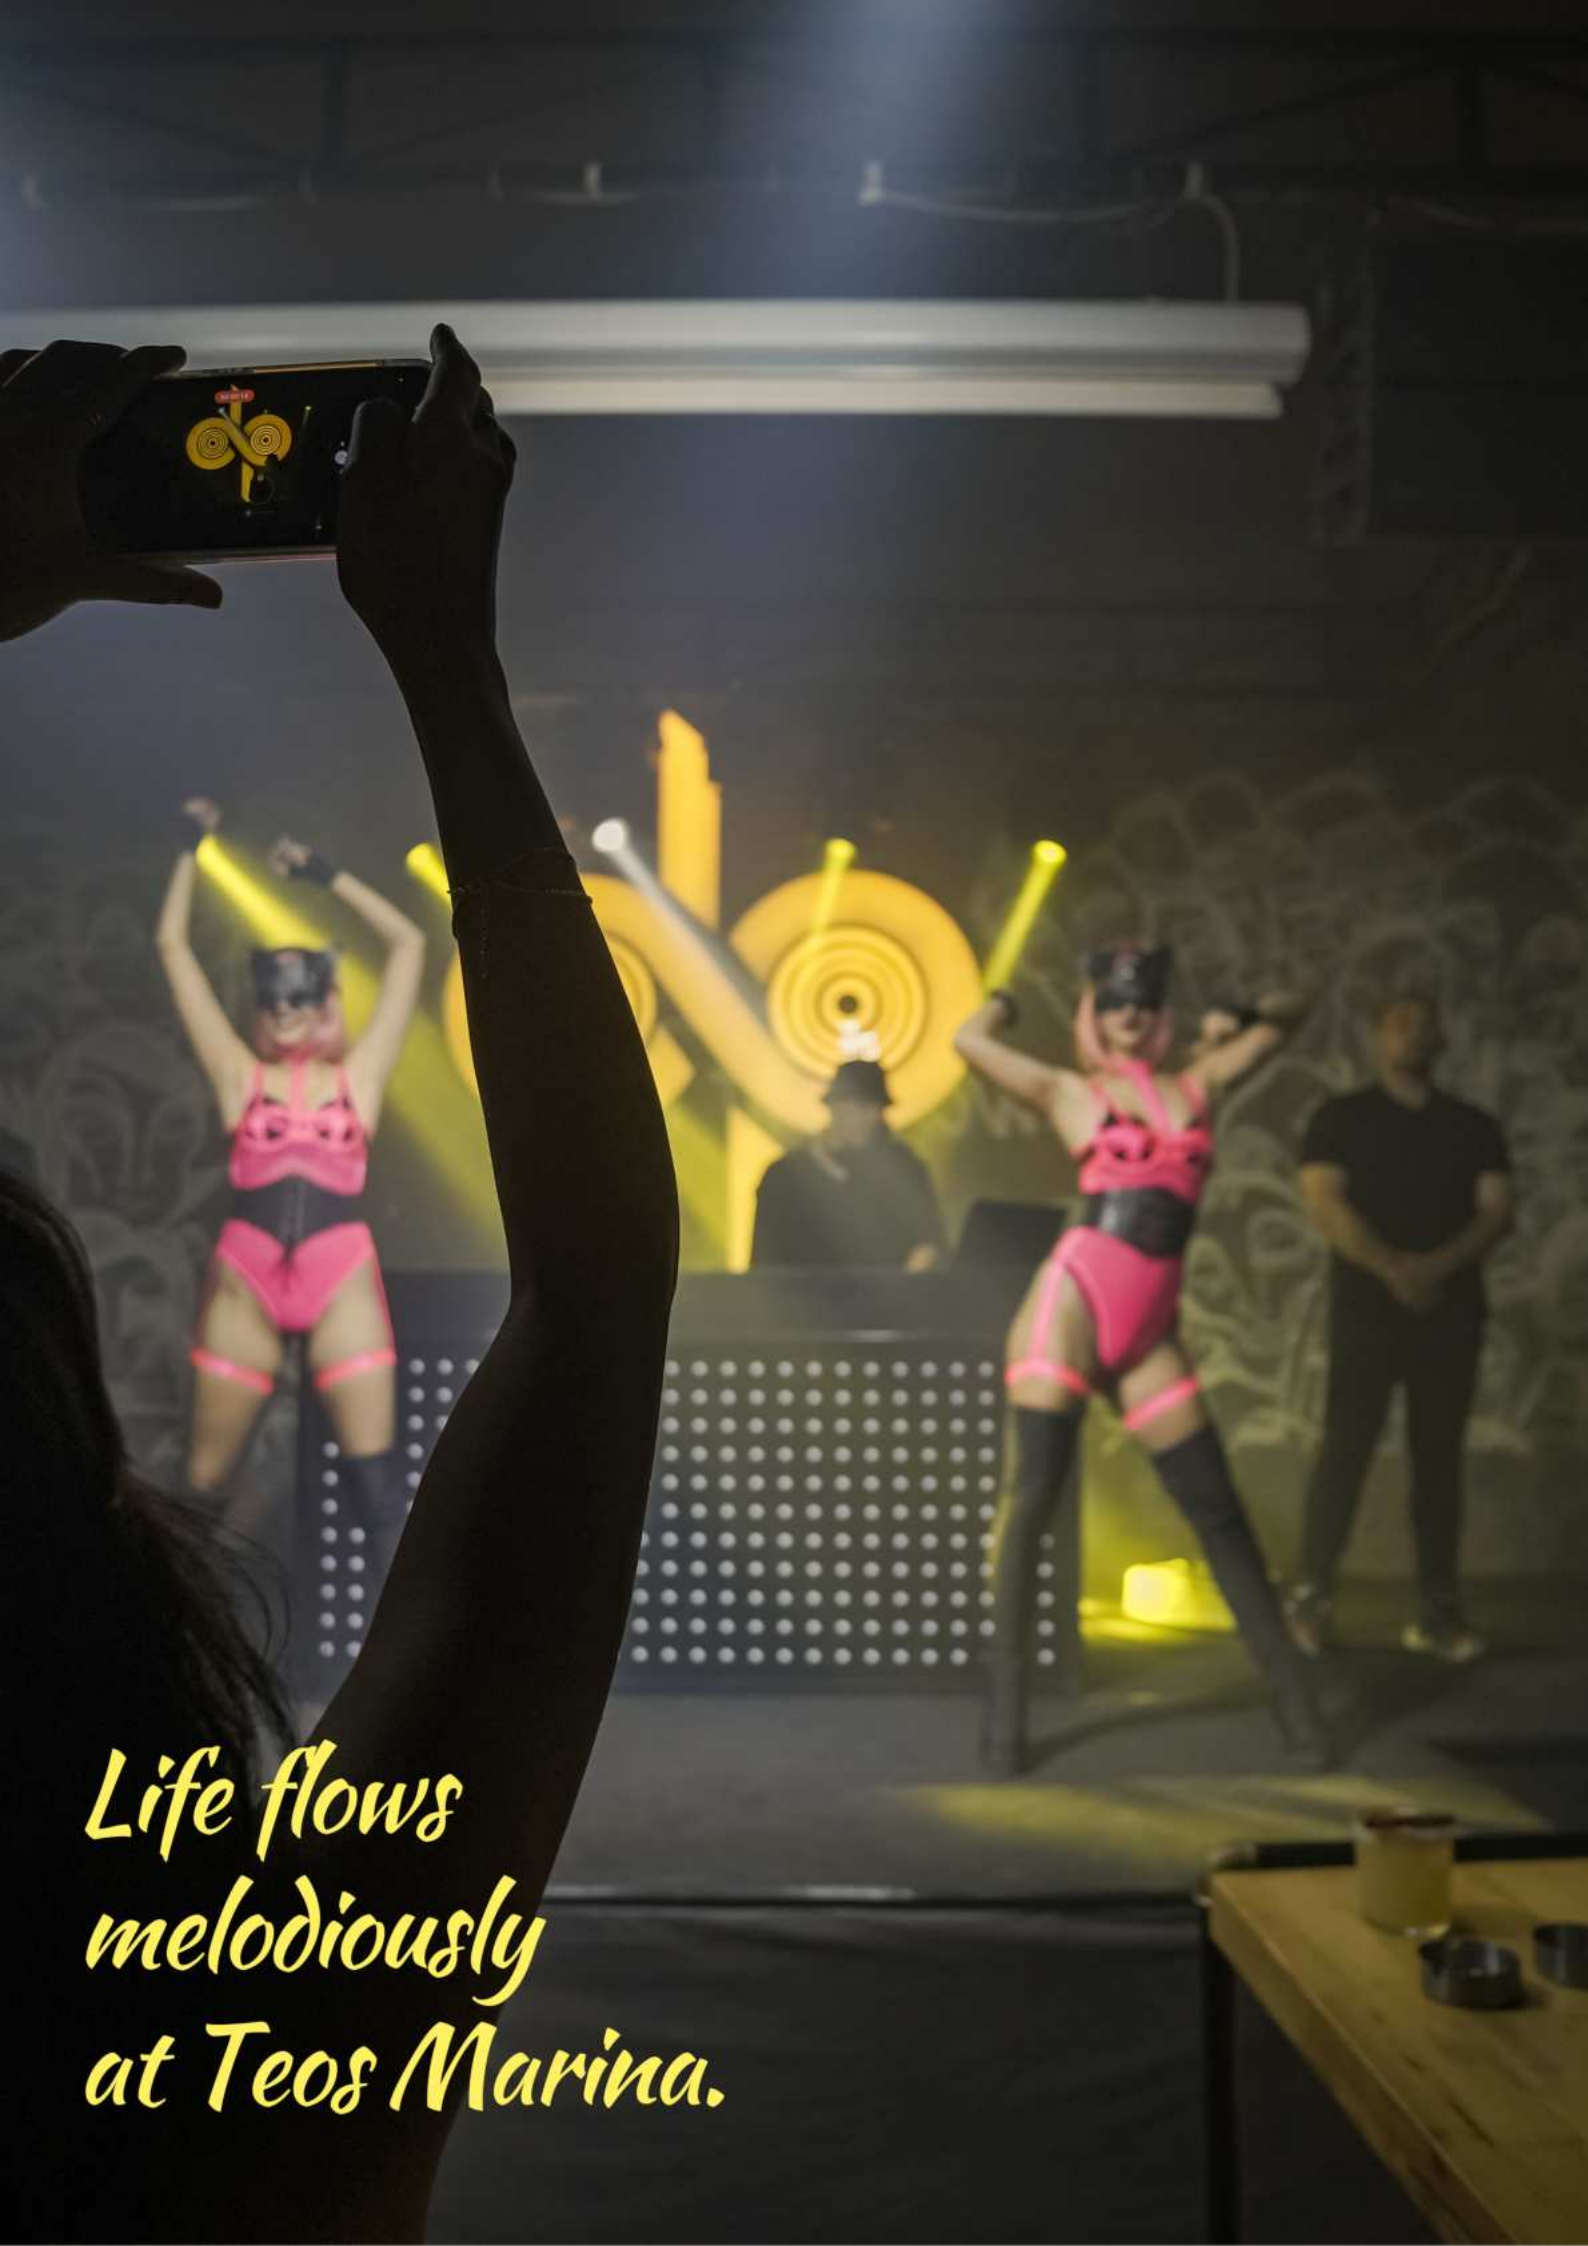

Göteborg, Sweden

Maritiman Museum, located in Gothenburg, Sweden and offering its visitors the opportunity to explore maritime history and Swedish maritime tradition, hosts a wide collection in both indoor and outdoor areas. Located in one of Gothenburg's most beautiful harbor areas, the museum offers a pleasant experience for those interested in maritime history.

Maritiman Museum, which houses old ships, maritime equipment and many historical documents that you can tour inside, promises much more than an open-air museum.

*Life flows

at Teos Marina.*

TEOS MARINA BLUE NEWS

CLASSICAL MUSIC FEAST AT THE GARDEN OF EDEN

The Garden of Eden, located in Teos Marina, hosted an unforgettable experience on August 10. The boat owners had a wonderful sunset experience next to the calm waters, accompanied by the unique performance of the Aegean String Quartet. This magnificent event was a soul-soothing serenade where the magic of nature and beautiful music came together.

The magnificent view of the Garden of Eden was almost painted at the point where the sea and the sky meet. Boat owners were amazed by the sky where golden hues and purple danced. Those who wanted to capture this moment took out their cameras and immortalized the magic of that moment. However, the most beautiful shots were undoubtedly the ones that remain in our memories.

TEOS MARİNA BLUE NEWS

TEOS MARİNA: THE ADDRESS OF QUALITY MUSIC!

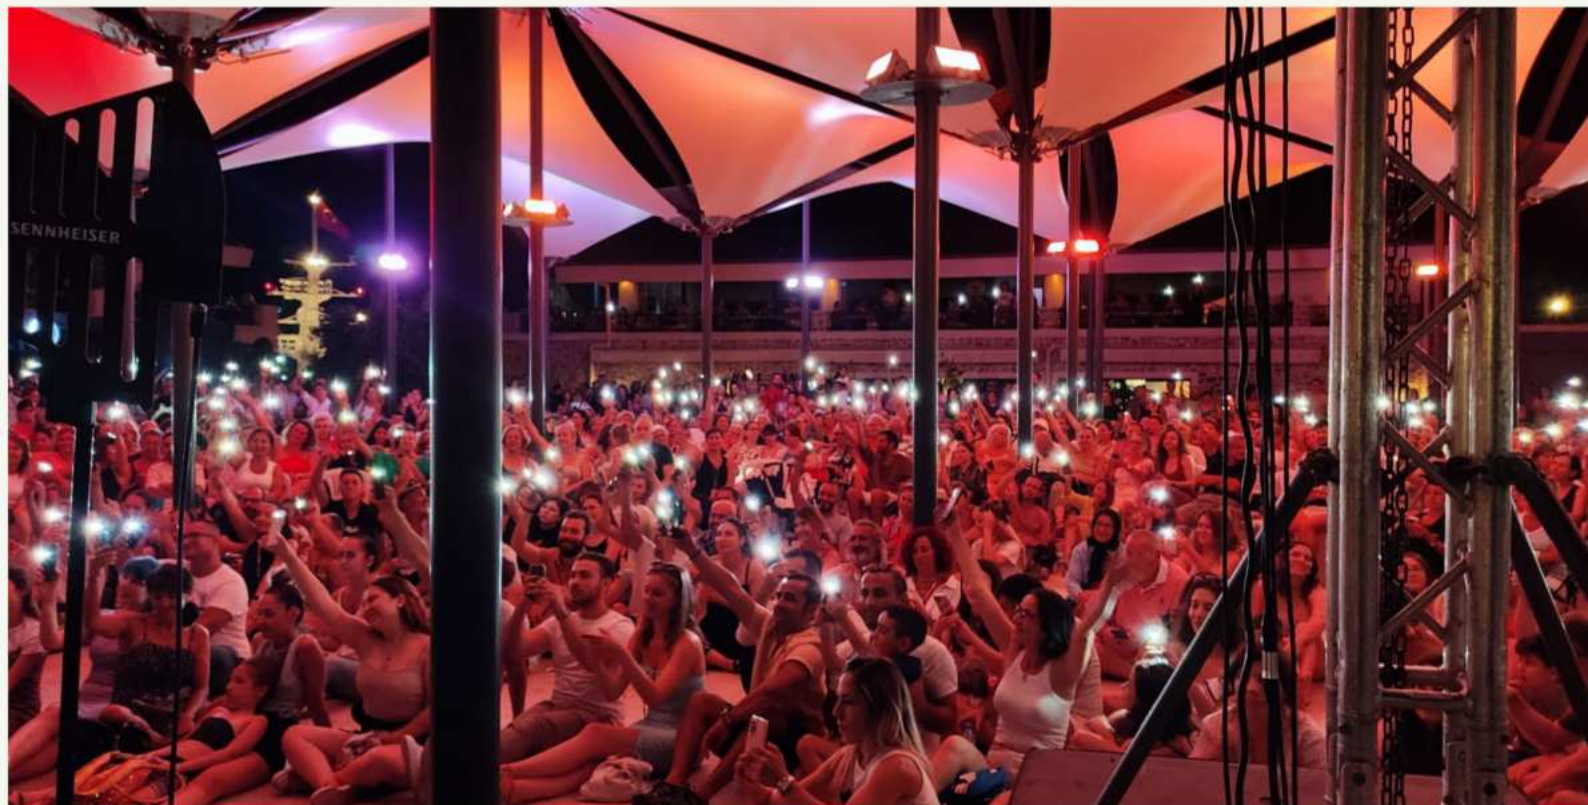

Teos Marina, the pearl of the Aegean, hosted an art and music festival this summer. Among the blue of the sky and the peace of the sea, music and art lovers flocked to Teos Marina, following the concert program full of famous artists performing on 17, 24 and 31 August.

Teos Marina Bazaar Concerts series, which provides unforgettable moments throughout the summer, brings together the most original representatives of different musical genres in the magnificent atmosphere of Teos Marina. The concerts started with Sunshine Band in June and continued with Birsen Tezer and Jehan Barbur in July. Sena Şener, Dolce Band and Evrencan Gündüz, who took the stage in August, met the audience in the unique charming atmosphere of the marina with their high energy and popular songs.

On August 24, we met in the Garden of Eden at a special event attended only by yachtsmen. The Jazz Quartet crowned this special night with its fascinating performance under the direction of Sibel Emek. The unique jazz rhythms of Sibel Emek and her quartet provided an unforgettable night by the sea under the stars.

Teos Marina proves once again the value it attaches to quality music and art and becomes a platform where not only beautiful sounds but also beautiful memories are shared. This unique place where sea, art and music lovers meet, as the Teos Marina family, will carry these meaningful events to the coming years.

We will continue to enjoy music and art together in the magical world of Teos Marina!

TEOS MARINA BLUE NEWS

A SMOOTH VOICE IN THE GARDEN OF EDEN: SİBEL EMEK & JAZZ QUARTET

Teos Marina hosted an unforgettable night for yachtsmen with the special event it organized on the evening of August 24th. At the event, where only boat owners were invited, the stage performance of Izmir's famous jazz artist Sibel Emek gave the audience unforgettable moments.

The event, which started in the evening, took place in Teos Marina's unique Garden of Eden. On this night when the sea was quite calm, yachtsmen listened to jazz tunes under the moonlight and experienced both the peace of nature and the magical atmosphere of music. Sipping their drinks on the cushions on the grass, the boat owners had a wonderful time in a comfortable environment.

TEOS MARINA BLUE NEWS

MASTER FISHERMEN OF THE HIGH SEAS TO COMPETE AT STAFU PRO TUNA MASTERS TEOS

This year, the 8th Stafu Pro Tuna Masters TEOS 2023 Fishing Tournament, which will be held under the main sponsorship of Stafu Pro and hosted by Teos Marina and under the auspices of Seferihisar Municipality, will take place between 7 - 10 September 2023.

All masters of deep sea fishing will be after giant fish again this year at Stafu Pro Tuna Masters TEOS 2023, which has attracted great attention since the first day it was held and has become one of the biggest tournaments in Turkey and Europe.

This year, 53 boats will participate in Stafu Pro Tuna Masters TEOS 2023, the first leg of the Tuna Masters series. In addition to the two boats coming from all marinas around Seferihisar and Cyprus, the competition will also include athletes from countries such as Russia, Ukraine, Saudi Arabia, South Africa and Greece.

In addition to competing in Stafu Pro Tuna Masters TEOS 2023, where the most and biggest fish have been caught for years, many world-leading brands will also take part in the tournament field with their products as sponsors.

Faruk Günlü, General Manager of Teos Marina, which hosted the tournament, said: "We are pleased to host the Tuna Masters Teos this year. Record-sized fish are caught every year in the fertile seas of Sığacık Bay. We completed our preparations for this tournament, which is welcomed with more enthusiasm and interest every year than the previous one, with the professional team of our marina. We look forward to the weigh-in final that will be held at Teos Marina's Garden of Eden on Sunday, September 10."

Making a statement about the program of the tournament, organizer Murat İyriboz said, "We will compete for records at StafuPro Tuna Masters TEOS 2023 on Friday, September 8 and Sunday, September 10. On Saturday, the event area will be open and our sponsors will showcase their new products, and the fun will continue at full throttle."

92ND İZMİR INTERNATIONAL FAIR STARTED!

Izmir International Fair, our Republic heritage, which started Turkey's fair organization adventure and embodies the commercial and cultural memory of our country with its firsts and innovations, brings the world together at Kültürpark in its 92nd year. Izmir International Fair, which will be the center of trade, culture, art and entertainment as every year, with events that will last for 10 days between 1 - 10 September 2023, is organized with the theme of "Youth", special for Izmir to be the "2026 European Youth Capital Finalist". This year, the Fair will further strengthen the city's bond with young people and strengthen the struggle for the future of young people who can achieve their dreams and are confident in their skills. On the 100th anniversary of our Republic, Izmir International Fair opened its doors to the new century with its deep-rooted history and progressive structure, with the power, energy and leadership of the youth.

It will host the International Textile Biennial

Izmir International Fair, which has broken new ground since its opening, is preparing to host the International Textile Biennial, which will be held for the first time in Turkey this year. The works in the Textile Biennial, which will open its doors on September 1 simultaneously with the fair, will meet art lovers at the Atlas Pavilion throughout the fair. Textile Biennial, curated by writer and artist Nihat Özdal, will include 61 participants from 25 different countries. Between 4 September and 24 November, Atlas Pavilion, Pakistan Pavilion, Agora, Etz Hayim Synagogue and Alga Chocolate Factory will be open to visitors. Throughout the fair, dozens of colorful events such as concerts, theater and competitions will be held.

TEOS MARİNA BLUE NEWS

PERSEID METEOR SHOWER OBSERVED AT TEOS MARİNA

Perseid meteor shower, a spectacular natural phenomenon that lights up skies over the Northern Hemisphere every year between July and August, mesmerized stargazers across Türkiye, offering unique sights of glittering celestial lights on Aug. 12-13.

Meteors entering the atmosphere at a speed of 55 kilometers per second illuminated the night sky across the nation.

A meteor shower is a celestial occurrence in which many meteors are seen to radiate from one point in the night sky. These meteors are caused by streams of cosmic debris called meteoroids entering Earth's atmosphere at extremely high speeds on parallel trajectories.

The meteor shower, which peaks in the second week of August every year, garnered great attention with the events being held in the capital Ankara, in the Mediterranean coastal city of Antalya, southwestern Muğla, eastern Erzurum, western Izmir, Aydın, Kütahya and several other provinces.

During these dates, many people came to Teos Marina's Garden of Eden and Sunbathing Platform to observe the stars.

STRUCTURES & CITIES

THAT

Touches Sea

Seas have been an important element of humanity throughout history. The courage and discoveries of sailors have left their mark on the world of architecture throughout history. The maritime theme adorns architectural structures around the world, adding a unique touch to the character of cities. These fun and unique architectural structures fascinate visitors by emphasizing the connection to maritime. In this issue, we have compiled fun architectural structures and cities decorated with maritime art for you.

SIDNEY OPERA BUILDING

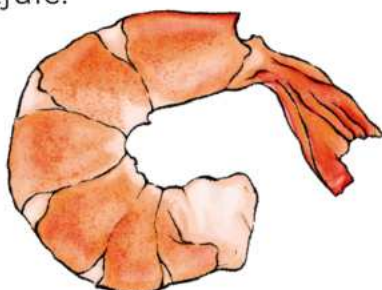

A famous cultural and architectural landmark in Sydney, Australia, the Sydney Opera House is considered one of the most important examples of modern sea-inspired architecture and is a UNESCO World Heritage Site. Opened in 1973, the building's iconic sail-shaped roofs symbolize the sailing ships and maritime heritage of Sydney Harbour. Hosting world-renowned opera, theater and concert performances, the building also hosts various events such as artistic events, exhibitions and conferences.

The neighborhood of Barcelona, also known as the Barceloneta district, has historically been associated with seafaring. Today, this area offers a harmonious mix of modern architecture and traditional fishermen's huts. Narrow streets, colorful buildings and terraces overlooking the sea offer visitors a unique, deep blue atmosphere.

Locals come to the beachfront La Barceloneta neighborhood to surf and sunbathe on Sant Sebastià Beach and dine at the outdoor seafood restaurants and traditional tapas bars. Flashy marinas like Port Olímpic, connected to the beach by a long, palm-lined road, are full of luxury yachts. The cable car offers panoramic city views as it ascends to the top of Montjuïc.

BARCELONA FISHERMEN'S DISTRICT

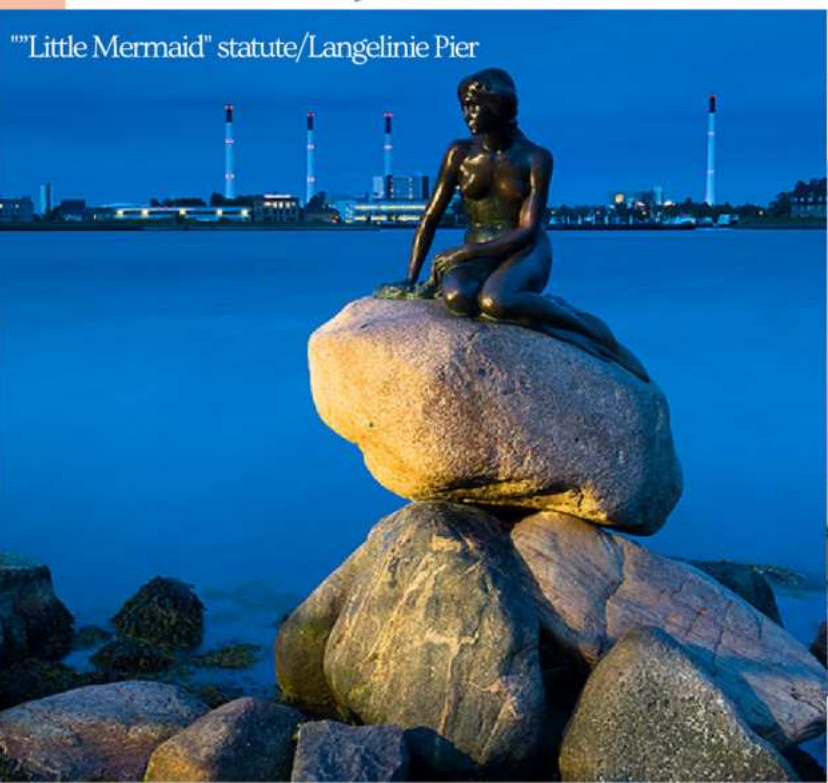

COPENHAGEN HARBOUR

Copenhagen means "merchants' port" in Danish. We are talking about perhaps the most maritime European country. The Copenhagen Port located here is a region with unique maritime-themed architectural structures. You can be sure that you will take the best photos here. Colorful warehouses, maritime museums and sailing ships around the harbor offer countless beauties that reflect Copenhagen's maritime heritage.

"Little Mermaid" statue/Langelinie Pier

Valencia City of Science and Arts is one of the unique examples of 22nd century modern and futuristic architecture! Structures resembling sailing ships and floating buildings reflect the maritime theme of Valencia in Spain in its most modern form. Constructed by Santiago Calatrava, one of Spain's most important architects, as an entertainment-based cultural, science fiction and architectural complex, the complex was designed with inspiration from the sea, space age and animal skeletons. The complex, which consists of 5 large buildings, includes an opera hall, a giant aquarium, a hemispheric pool designed in the shape of an eye, a science museum and a botanical garden.

VALENCIA CITY OF SCIENCE AND ARTS

DUBAI PALM ISLAND

Dubai's Palm Island, located in the United Arab Emirates, is an artificial island complex with unique maritime architectural structures. Artificial islands attract attention with their structures resembling sailing ships and hotels associated with luxury maritime. Marinas owned by luxury hotels and resorts on the island offer accommodation and maintenance services for mega yachts and boats.

MOVE

TEOS MARINA

From sea to course: Let's play some golf!

The sport of golf, which emerged in Scotland at the beginning of the 15th century, is played fondly all over the world today. Golf, which requires strategy, calculation and focus in addition to physical strength, requires skills that are quite familiar to sailors, such as good planning and attention skills. Although it may seem like a slow-paced sport, it improves your cardio health by keeping the body constantly active. You can gain both physical and mental fitness with golf, where you can develop skills such as coordination, balance, flexibility and focus. For those who want to discover the beauties of nature and have pleasant moments while doing their sports, we wanted to take a look at the two golf courses close to Teos Marina: İzmir Golf Club and Kuşadası Golf Club are waiting for you to increase your quality of life.

İZMİR GOLF CLUB

It was established as a total of six holes, five Par-3 and one Par-4, on approximately 50 decares of land, in Turkey's Tuscany Urla, in the İçler region on the İzmir Çeşme road, in the south of Torasan Village, adjacent to the west of the SIRASELVİLER Site. Izmir Golf Club is one of the favorites of golf enthusiasts.

Transportation to the site is cheerful and simple and can be easily reached from both the İzmir-Çeşme highway and the İzmir-Çeşme normal highway. You can play golf with pleasure at the İzmir Golf Club, which is approximately half an hour away from İzmir and Çeşme, and can be accessed in all four seasons of the year.

In the area, which is under the influence of Karayel winds from the sea and Lodos winds from the south, the weather is cool in summer and warm in winter.

For those who want to get acquainted with golf or join the game with those who are new to golf, you can take golf lessons from Turkish Golf Federation Licensed coaches by contacting the club that has DIVIDER RANGE, CHIPPING, PUTTING GREEN and TRAINING BUNKER.

For detailed information about İzmir Golf Club, İzmir's first and only golf club, you can visit <https://izmirgolfclub.com/>.

SERİ MARINE

GARMIN™

AUTHORIZED DEALER

Seri Marine olarak bizler Garmin ve Suzuki başta olmak üzere dünyanın önde gelen sportif balıkçılık markaları ile iş birliği içerisinde hareket etmekteyiz. Teos Marina içerisinde bulunan mağazamızda hem ürün satışı hem de satış sonrası hizmetleri gerçekleştirmekteyiz. Denizcilik ve sportif balıkçılık tecrübelerimiz ile hızlı ve çözüm odaklı şekilde siz değerli müşterilerimizin hayallerini gerçekleştirmek için sabırsızlanıyoruz.

0 545 171 25 55 - 0 545 370 55 22

KUŞADASI GOLF CLUB

The par 72 championship course at Kuşadası International Golf is designed for a real golfing pleasure. The stunning course follows the undulating lines of the natural landscape and overlooks a protected national park.

The Bermuda grass field glides through the Mediterranean forest of centuries-old pine, plane and olive trees, reaching the breathtakingly beautiful view of Kuşadası Bay and the Aegean Sea.

To make your golf experience even more exciting, the 6,322-meter-long challenging course, surrounded by trees on both sides, features lakes, many water hazards, and dozens of mounds and sandpits.

There are raised tees, especially on the 3rd course holes, which facilitate different shot options with the possibility of adjusting the difficulty level to suit the competitions and player levels.

Fairways are augmented with obstacles designed to widen the ball's drop area during tee shots, then narrow down near the holes by combining with trees, mounds and similar obstacles to punish bad approach shots, and include natural waterways, hills, mounds bordered by trees and bushes, and lakes. is also on the field.

With green areas protected using natural topography, trees, obstacles and mounds and designed to increase the difficulty and variety of shots, you will witness meticulous designs that will maximize the variety of alternative flag positions, offer putt diversity and reward risks while punishing bad shots.

If you are looking for a field where you can push the limits, you are in the right place.

IT IS ESSENTIAL TO PREVENT CONFLICT AT SEA! WELL, HOW?

UNDERSTAND THAT THERE ARE 38 RULES DETERMINED BY INTERNATIONAL AGREEMENTS TO AVOID CONFLICT BETWEEN TWO OR MORE BOATS ENCOUNTERING AT SEA AND EVERY SEASON MAY USE AND UNDERSTAND THAT "INTERNATIONAL SEASON PREVENTION OF CONFLICT AT SEA" DO YOU LIKE? WE HAVE COMPILED INFORMATION ABOUT THE CONTENT OF THE CHARTER AND MORE FROM CAESAR ATMACA'S "AMATEUR SAILOR HANDBOOK" FOR YOU.

CONTENT OF THE REGULATION

The Regulation for Preventing Collision at Sea consists of "Application", "Responsibility" and the four-part "General Definitions". General Definitions define the rules to ensure that motorized and sailing boats do not collide at sea, the lights and objects they must carry under low visibility conditions and the sound and light signals to be used at sea. It also has four appendices that cover the exact locations and specifications of lights and objects, the signals to be carried by fishing boats, the technical details of instruments used to give sound signals, and distress signals.

TRAFFIC SEPARATION REGULATIONS

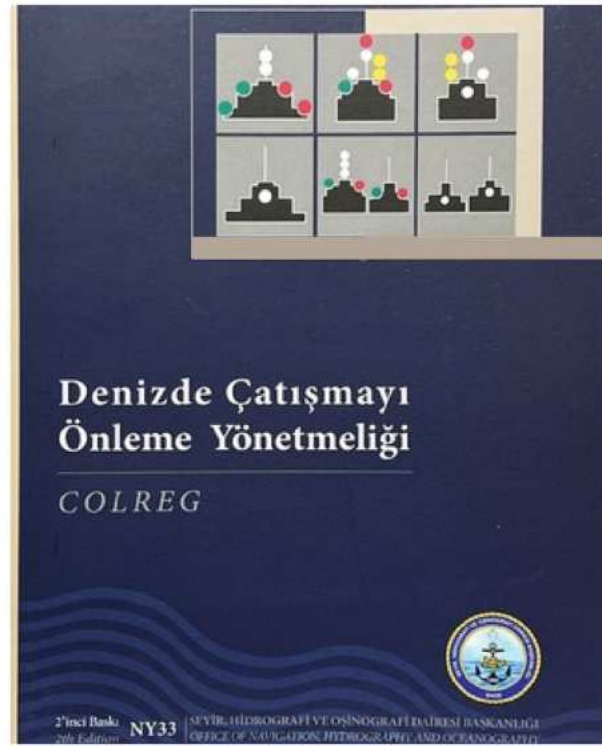

A very important part of the statute is Rule 10, which describes the "Traffic Separation Schemes", which we can call the "ship highway", which is the mandatory navigational route of the ships. In accordance with this rule, boats less than 20 meters in length shall not obstruct the passage of motor boats following the lanes within the traffic separation scheme, that is, using the ship way, and shall avoid this arrangement by passing as far as possible. Except in an emergency, immediate danger, a vessel will not normally enter the separation zone and will not cross the separation line, except a vessel crossing the road or entering or exiting the traffic lane. Disobeying the traffic separation rules, which are clearly and in detail (traffic lane, dividing line, dividing zone) on navigational maps, is as dangerous as cycling on the highway.

MOTOR BOAT / SAILING BOAT DESCRIPTION

According to the regulations, a boat that uses any mechanical power, including oars, is considered a motor boat, while a sailing boat is a boat that sails with only its sails. A boat with open sails but powered by a motor is considered motorized.

LIGHT AND SIGNS

The lights that must be carried on the boat at night have two purposes. Navigation lights are designed and placed so that a vessel viewing them can infer the course of the vessel carrying the lights. Other lights serve to indicate the type and size of a boat. Spherical and cone-shaped objects are used to signal during the day, while sound signals are used to indicate the movement and size of the boat in low visibility situations such as fog.

DO NOT FORGET THESE POINTS IN MIND DURING SAILING!

CONFLICT PREVENTION RULES

Below are examples of the rules that should be followed in general to avoid collisions while sailing, but in case of any doubt, it would be correct to look at the "Maritime Collision Prevention Regulations" that every boat should have, as there may be many special situations and changes. Here are some of those rules:

- In order to prevent conflict, the area where there may be a risk of conflict should be observed using all available means (human, binoculars, even whistle). (Rule 5)
- As stated in the regulations, if there is a danger of conflict when boats meet, they must avoid this danger by appropriate maneuvering, even if it means acting outside the rights of way (Rule 8). In other words, if a right-of-way boat does not give way to the other boat, it should prevent a possible collision by making an appropriate maneuver.
- It should be remembered that even if you are right according to the rules in the statute, this will not relieve you of responsibility, and every precaution must be taken to prevent conflict (Rule 2).
- Responsibilities between boats such as motor boats, boats with limited maneuverability, sailing boats and fishing boats, that is, who gives way to whom (Rule 18), should be learned well.
- Where one of the two boats has to go out of the way of the other, the other will keep its course and speed (Rule 17). The boat obliged to give way must show or announce to the other boat as early and clearly as possible that it has made the necessary maneuver.
- It should be noted that there are exceptions to the rules. For example, every sailboat or motor boat under 20 meters in length must give way to ships / tankers in the Bosphorus (our Straits) / narrow channels (Rule 9). It is very difficult for giant ships such as tankers to see especially small boats in their bows.

AN AEGEAN COAST TOWN EXPERIENCE

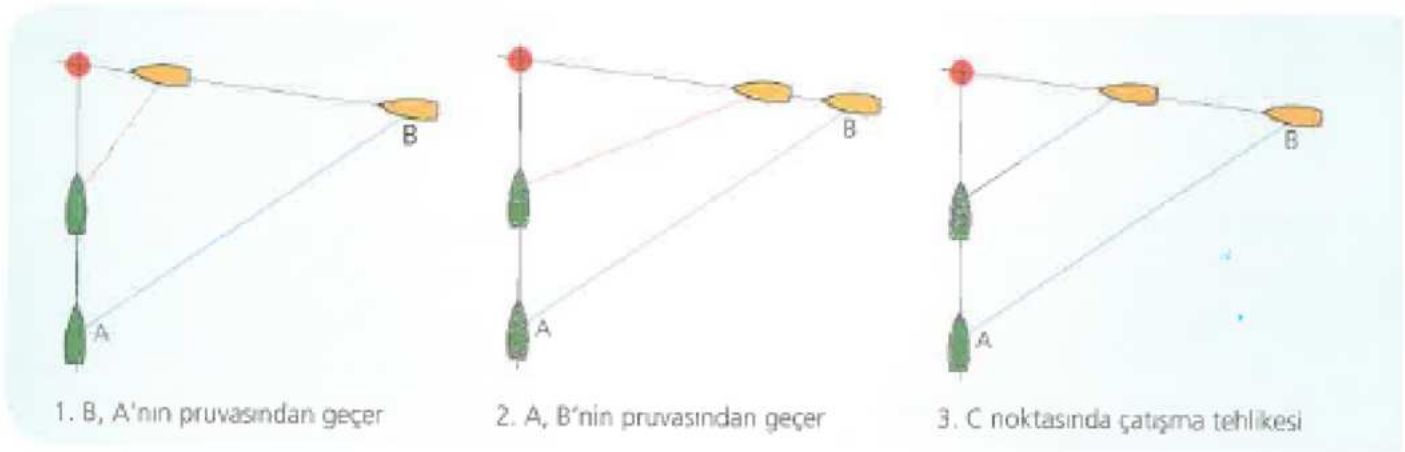

TEOS MARINA ÇARŞI

Follow [@teosmarinaofficial](https://www.instagram.com/teosmarinaofficial) on instagram for concerts, events and more.

CONFLICT DANGER AND CROSSING SUPERIORITY

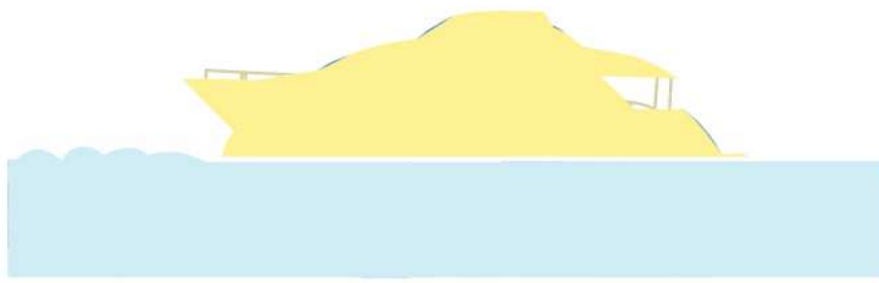

If the route of two boats is extended and they intersect at a point, there is a "danger of conflict". Conflicts between boats depend on their ability to maintain their course and their speed. The possibility of collision between boats can be understood with a simple method.

Looking at the image above; Boat A takes the relative bearing of the other boat (B) from its fixed equipment such as crossbars and railings and, if possible, from more than one point. After a while, if boat B is in front of the bearing line, it will pass through the bow (1) of boat A, if it is behind the bearing line, it will pass through its stern (2). If boat B is still on the same bearing line, (3) it means boats A and B will collide.

The most important navigational rules are those that must be followed by boats approaching each other in such a way that there is a risk of collision.

RIGHT OF WAY FOR MOTOR BOATS

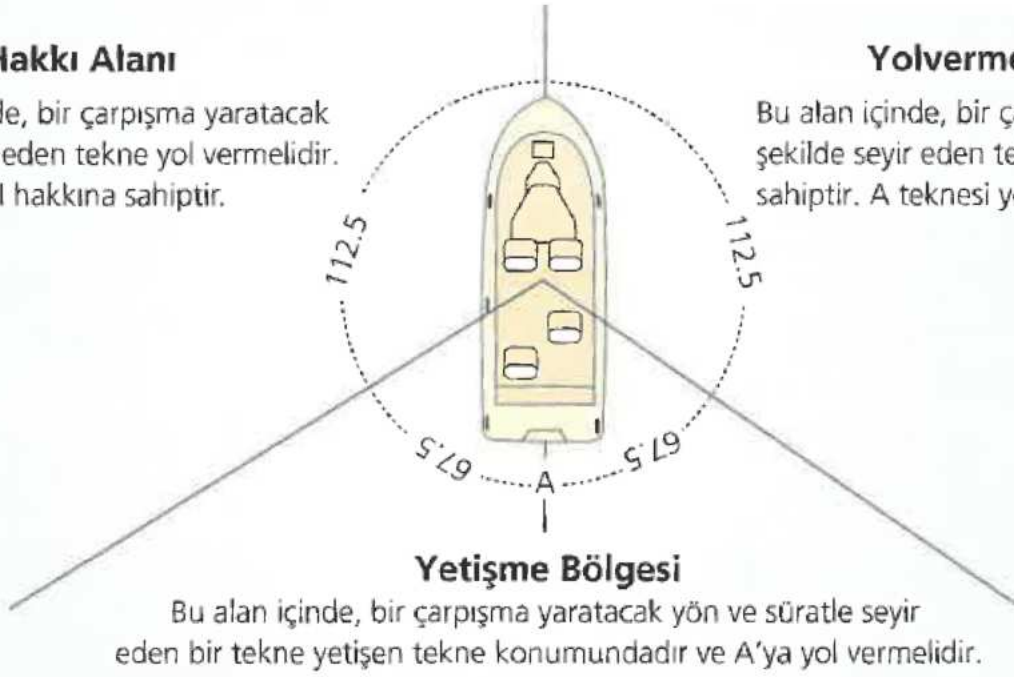

As a general rule in any encounter boats should always turn to starboard. For example, if two boats meet nose to nose, both must turn to starboard. So they pass each other's scaffolding. If a boat approaches another from starboard in a way that conflicts with it, it has the right of way, must maintain its direction and speed, and the other boat must give way to this boat coming from starboard. However, if the boat coming from starboard is overtaking, it must give way. (see Figure 20.4)

Yol Hakkı Alanı

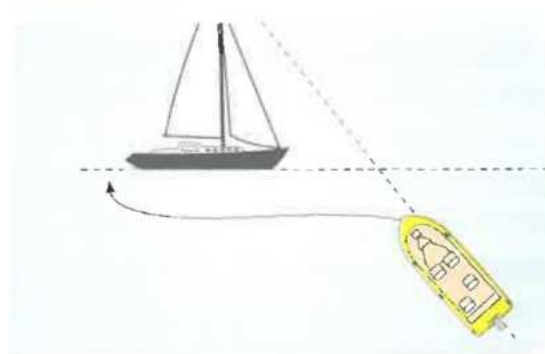

Bu alan içinde, bir çarpışma yaratacak şekilde seyir eden tekne yol vermelidir. A teknesi yol hakkına sahiptir.

Yolverme Alanı

Bu alan içinde, bir çarpışma yaratacak şekilde seyir eden tekne yol hakkına sahiptir. A teknesi yol vermelidir.

Şekil 20.4. Motorlu teknelerde yol hakkı

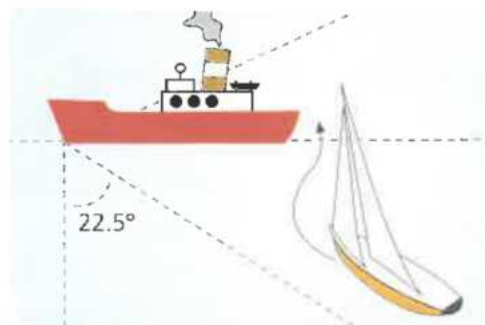

Şekil 20.3. Motorla yürütülen tekne yelkenli teknenin yolundan çıkacaktır (Kural 18/a)

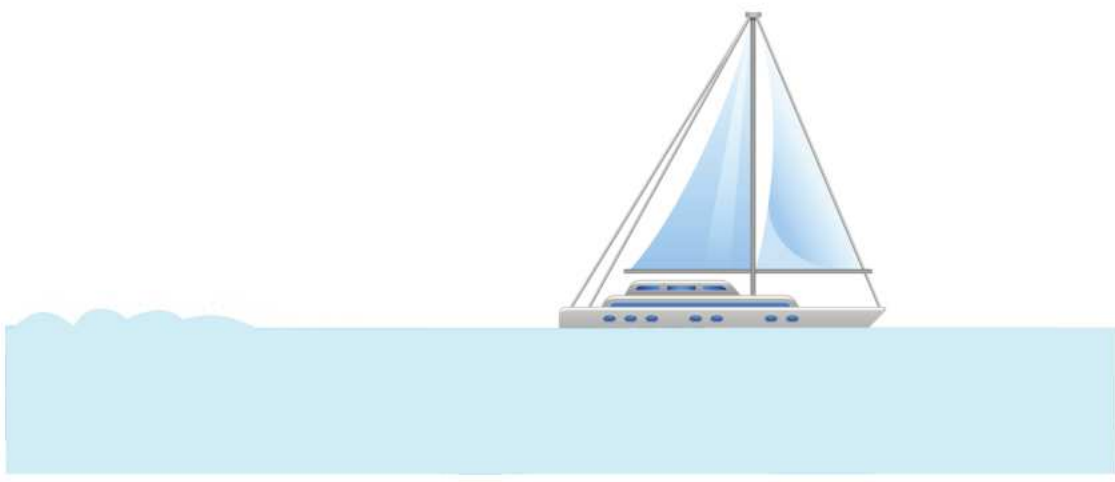

If a boat approaches another boat from more than 22.5 degrees (2 notches) behind its beam (if it sees only the stern light at night and cannot see any of the sidelights), it is considered the overtaking boat and must give way to the boat it overtook.

Again, as a general rule, a motorboat must give way to a sailboat (see Figure 20.3)

An exception to the rule is when a sailboat catches up with a motorboat. In this case the sailboat gives way (see Figure 20.5)

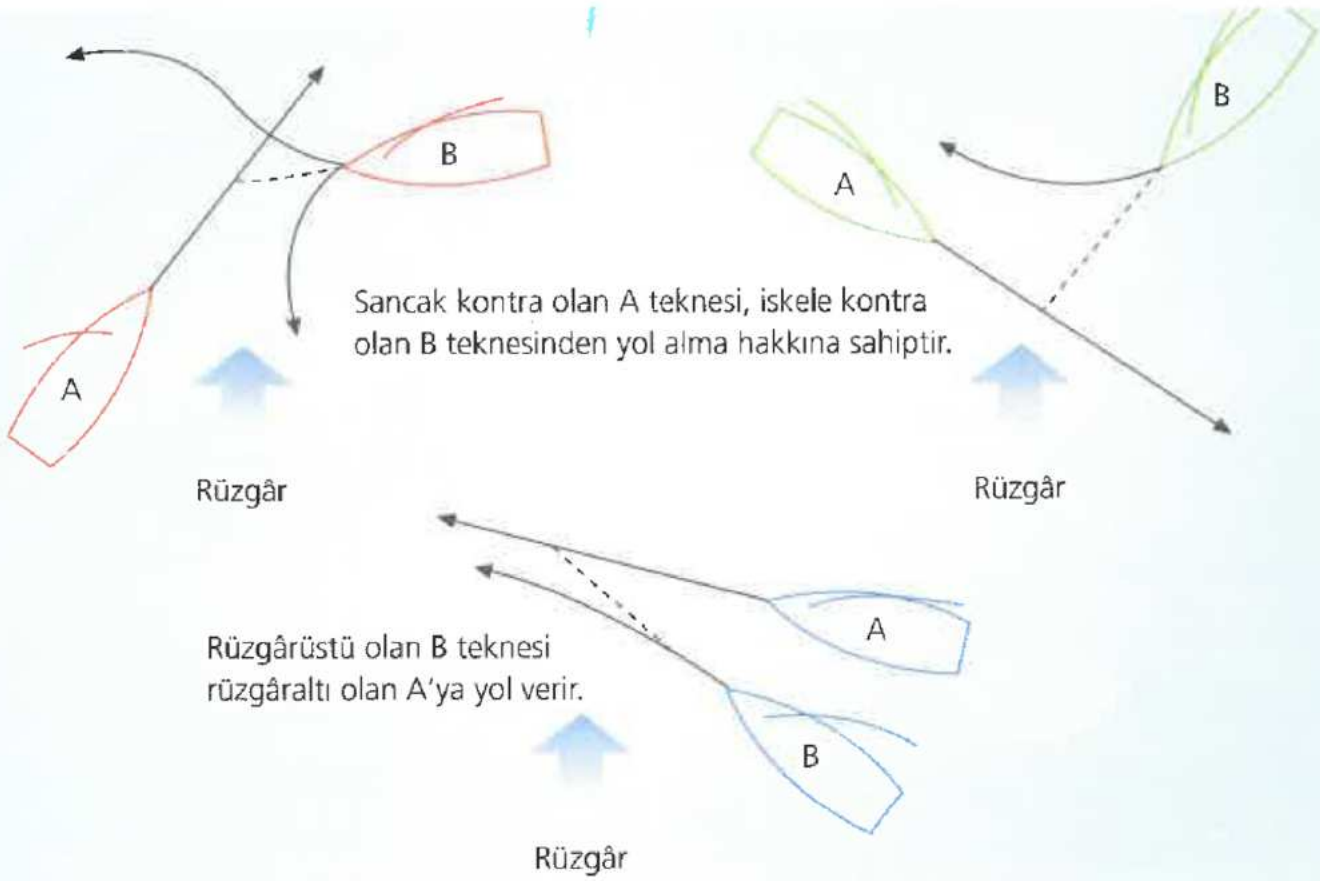

Şekil 20.5. Motorlu tekneye yetişen yelkenli tekne

RIGHT OF WAY FOR SAILING BOATS

The rules between sailboats are clear and sharp. Among two sailboats meeting on different tacks, the one with port tack, that is, using the wind from port, must give way. The right of way belongs to the boat with starboard tack, that is, the one that inflates its sails with the wind from starboard. When they meet on the same tacks, the downwind boat gives way to the downwind boat.

Şekil 20.6. Yelkenli teknelerde yol hakkı

RIGHT OF WAY DURING NIGHT

As a general rule, if a red light is seen on the starboard at night, that boat should be given way, and if a green light is seen on the port, continue on the road.

THE NEW TASTE OF SHOPPING

TEOS MARINA

Galley Recipes

CHICKEN AND VEGETABLES PAN

It is both healthy and suitable for the boat,
a practical protein and vitamin source recipe.

Ingredients

- 2 chicken breasts (optionally, you can also use chicken thighs)
- 2 tablespoons of olive oil
- 1 large onion, chopped
- 2-3 cloves of garlic, chopped
- 2 large potatoes, diced
- 2 large carrots, sliced
- 1 large zucchini, sliced
- 1 red pepper, chopped
- Salt and pepper
- Fresh herbs or spices (for example, fresh thyme or basil)
- 1/2 cup chicken broth or water

Recipe

- 1.Heat the pan over medium heat and add the olive oil.
- 2.Season the chicken breasts with salt and pepper, then pan-fry them on both sides and set aside.
- 3.Add chopped onion and garlic to the same pan and fry until softened.
- 4.Add the chopped vegetables to the pan and cook, stirring, until the vegetables soften, about 5-7 minutes.
- 5.Add salt, pepper and fresh herbs or spices. Add chicken broth or water and mix.
- 6.Add the chicken breasts back to the pan and place on top of the vegetables.
- 7.Cover the pan and cook the pan over low heat for 15-20 minutes or until the chicken is thoroughly cooked.
- 8.Serve the dish hot and sprinkle with fresh herbs or spices.

Enjoy!

Due to the high occupancy rate in both the sea and land areas of Teos Marina, you should definitely make a reservation in advance. There are many attractive reasons to spend a safe and peaceful winter at Teos Marina, but you have little time to find a place with affordable offers.

1 book

The Mirror of the Sea, Joseph Conrad

First published in 1906, *The Mirror of the Sea* was the first of Joseph Conrad's two autobiographical memoirs. Discussing it, he called the book "a very intimate revelation. . . . I have attempted here to lay bare with the unreserve of a last hour's confession the terms of my relation with the sea, which beginning mysteriously, like any great passion the inscrutable Gods send to mortals, went on unreasoning and invincible, surviving the test of disillusion, defying the disenchantment that lurks in every day of a strenuous life; went on full of love's delight and love's anguish, facing them in open-eyed exultation without bitterness and without repining, from the first hour to the last."

1 movie

Lost in the Pacific:

A story centered around a group of elite passengers on board an inaugural luxury, transoceanic flight that turns into a disaster.

It is the year 2020. The new luxury airbus from Ocean Airlines takes off on its maiden flight from Brazil to Hong Kong. In reality, Ocean Airlines' stock is falling and CEO Gary Gao has gambled everything on the new plane being a success. Various reporters and celebrities have been invited to come aboard, although Gao is not happy when he finds his assistant has invited Colin, the son that Gao has disowned and is now a successful pop star. The plane is caught in a storm. Gao insists they keep going rather than detour and miss the gala landing in Hong Kong. The engine is then damaged and they are forced to put down on tiny Fortune Island in the middle of the Pacific. On the ground, they are abruptly attacked by mutant cats. They also take on board two soldiers fleeing from the cats who say they are part of a UN exploratory sortie. As they return to the air, the substitute chef Mike, who used to be a former marine, has doubts about the two soldiers' story and is proved right when they take over the plane at gunpoint.

1 museum

Istanbul Maritime Museum

The Maritime Museum, Turkey's largest maritime museum, is among the world's leading museums in terms of the diversity of its collections. The Maritime Museum, which has been presenting its rich collection to its visitors for 125 years, continues to explain Turkish maritime history to its visitors.

The Naval Museum is located right next to the tomb and monument of Admiral Barbaros Pasha, who played an important role in the Preveza Naval Victory. The core collection of the museum, which was established in Kasımpaşa in 1897, was created by Major Süleyman Nutki. The first core collection includes ship parts and weapons.

A collection of historical boats, ship parts, historical weapons, standards, textile works, glass and stone works and wooden works also await visitors in the museum. The museum, which contains more than 23 thousand artifacts, is among the richest military museums in the world in terms of diversity.

Busts of important people in Turkish maritime history at the entrance and upper floors of the museum; Mustafa Kemal Atatürk's lifeboat belonging to Savarona Yacht and the boats he used; Sultanate boats and coats of arms used on ships are included. After passing through the connection on the second floor to the area where artifacts from the Ottoman and Turkish Republic Period Navy are exhibited, another area that attracts the attention of visitors is the collection prepared for the history of diving.

DID YOU KNOW?

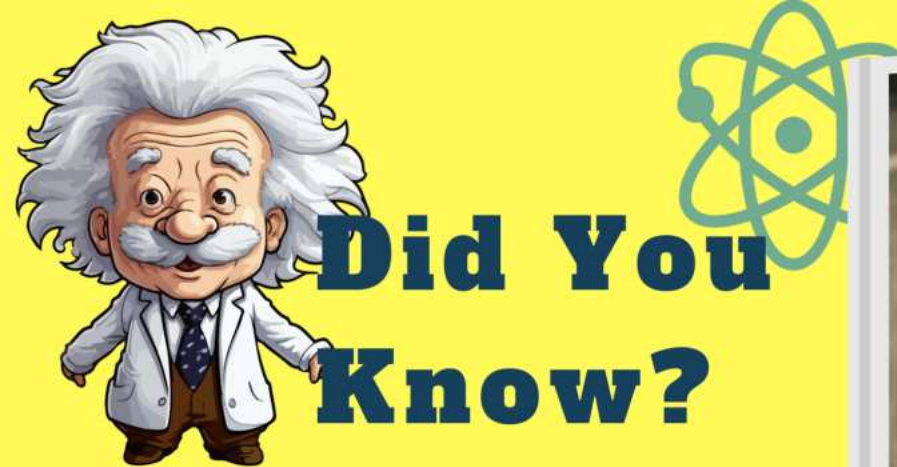

THAT EINSTEIN
LOVED THE SEA!

A NEW HOBBY

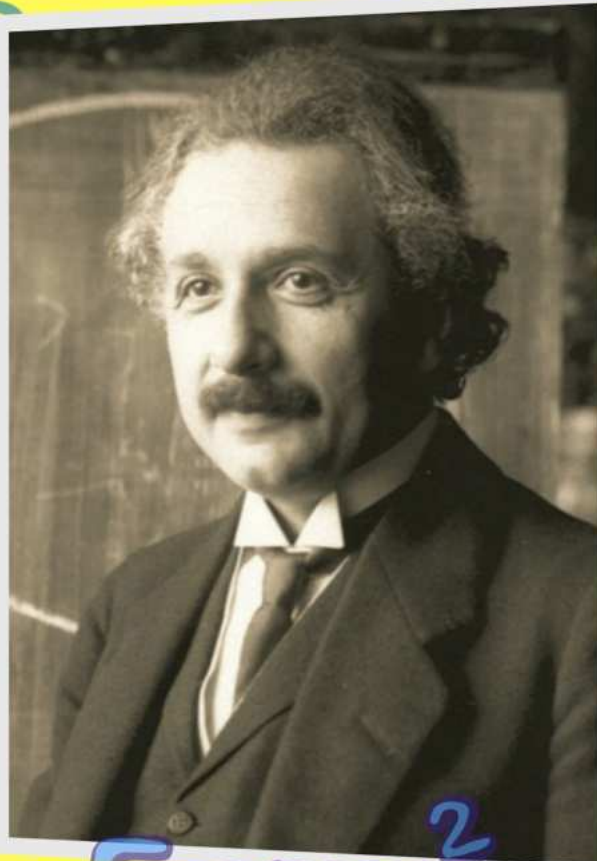

HOW
ABOUT
FISHING?

BLUE MARLIN AND HEMINGWAY

ABOUT THE BLUE
MARLIN, THE
LARGEST OF THE
SWORDFISH FAMILY,
AND THE MASTER
WRITER HEMINGWAY

Did You Know?

$$E=mc^2$$

THE FAMOUS PHYSICIST ALBERT EINSTEIN ALSO LOVED TO SAIL AND SAILED ALL HIS LIFE.

Albert Einstein, a physics scientist, put forward many theories that contribute to science today, as well as in history. Well, did you know that Einstein, who carried out studies in various fields such as the theory of vulnerability, the deflection of light by gravity, Mercury perihelion and Quantum theory, was also a sailor? However, he is a very bad sailor! Let's get to know the sailor Einstein together.

Many people consider Einstein to be the greatest mathematician and physicist the world has ever known. But his achievements as a sailor are not that well known, and for good reason: Because Albert Einstein was a terrible sailor!

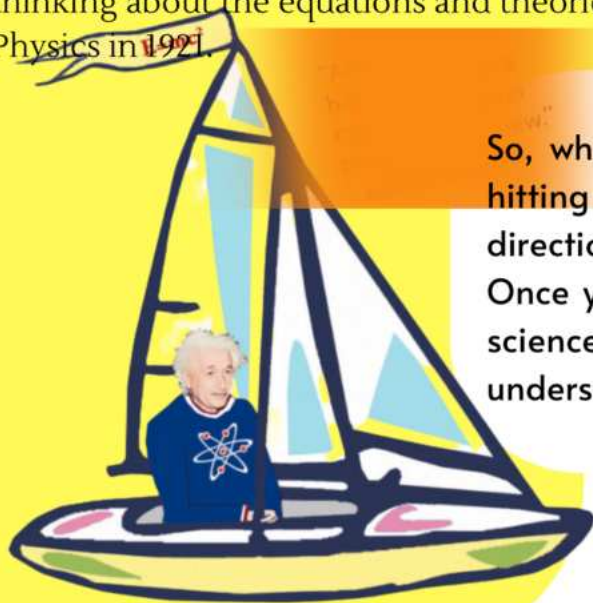

You might think that someone whose scientific insights changed the world would have no problem with something as simple as steering a boat in a certain direction. However, in Albert Einstein's case, it is necessary to think again.

His friends said that Einstein was distracted and forgetful when he boarded a sailboat. Every time he set sail, his family was horrified. Einstein did not know how to swim, but he also refused to wear a life jacket. He was so busy resting that he didn't look where he was going, so he always ran his boat aground.

Still, Einstein loved sailing and sailed all his life. He had learned what little he knew about sailing on a boat he borrowed in Switzerland in his youth. When he was fifty, his friends gave him a 23-metre sailboat, which he named Tümmeler, which means dolphin in German.

Einstein used to say that he loved sailing because it gave him a chance to relax after all his work thinking about the equations and theories in his work. These theories earned him the Nobel Prize in Physics in 1921.

So, when you set out on a sailboat and manage to avoid hitting something (not to mention steering your boat in the direction you want to go), you're doing something I can't do. Once you learn how sails work, you will master a branch of science that one of the world's greatest scientists never understood!

A new hobby: Let's go fishing!

There are many beautiful things about the changes that occur in nature with the arrival of autumn. Now that the very hot weather is behind us, spending time in nature has become even more enjoyable. In our opinion, one of the most magical activities of autumn is fishing! This fun and educational hobby not only offers the opportunity to explore nature, but also teaches skills such as patience, endurance and love of nature.

Then Let the Preparations Begin!

There are some preparations you need to make before this activity where you can have a pleasant time with your family. Here are the basic things you need:

1. **Fishing Gear:** Different fishing gear may be needed to catch several different species of fish. Therefore, get a variety of fishing gear. A light and easy to use machine makes your job easier.
2. **Baits and Feeders:** Get different types of baits and feeders that you can use to attract fish. Although grass grass is generally used, you can discover which fish prefer which bait by trying different baits.
3. **Clothing:** Choose the right clothes to protect yourself from the harmful effects of wind, rain and sun while fishing.
4. **Patience and Good Mood:** The fishing experience can sometimes require patience. So enjoy it without giving up! Until you catch your first fish! Believe me, you will enjoy it very much.

BLUE MARLIN AND HEMINGWAY

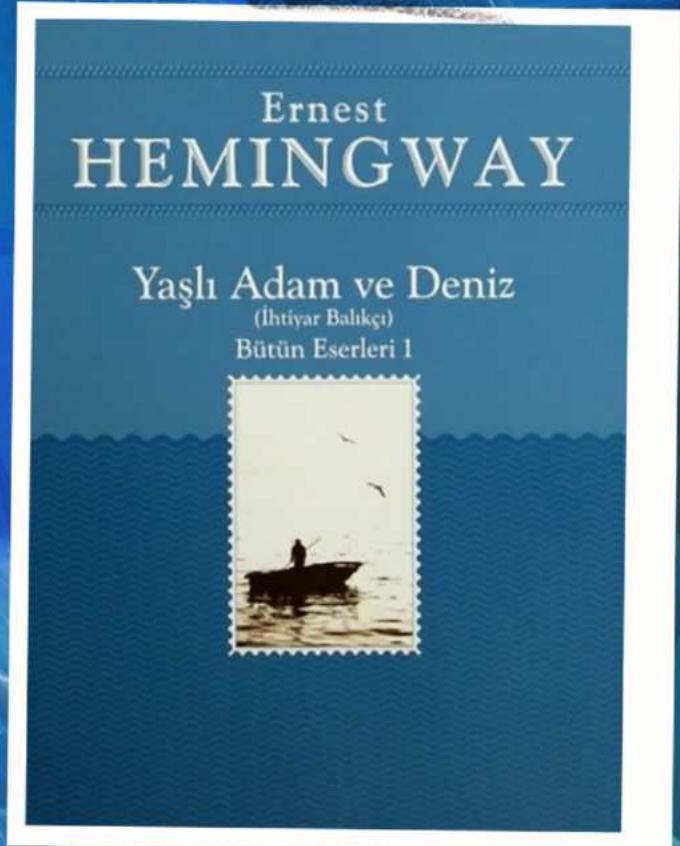

Ernest Hemingway is a writer best known for his stories and great hunting and bullfighting adventures. But did you know that at the end of his career, he won the Pulitzer and Nobel Prizes for his novella set in the ocean?

Hemingway was also a dedicated deep-sea sports fisherman, often spending more than half the year in the waters of the Florida Strait!

In 1934, Hemingway purchased his own fishing boat, the Pilar, which he sailed into the Gulf Stream from his home in Key West, Florida, and later from Cojimar, Cuba. Fishing, II. He patrolled enemy submarines in World War II and assisted marine biologists with observations and collections.

Let's discover together the story of how Hemingway crossed paths with the Blue Marlin.

Ernest Hemingway was well aware of what he was writing when he published *The Old Man and the Sea* in 1952. This novella is the story of Santiago: Santiago, a poor but proud old Cuban fisherman, one morning goes farther into the Gulf Stream than the other men. Using only a small wooden boat, fresh bait and a rope, Santiago manages to catch a giant blue marlin. After three days of struggle and superhuman endurance, the old man kills the marlin with his harpoon. Santiago estimates that the fish weighed over 700 kilos.

The old man ties the fish to his boat to take it home to the market.

Hemingway writes, "He couldn't believe the size of the fish's head. He untied the harpoon, pulled it through the fish's gills and out of his jaw, made a spin around his sword... and secured it to the bit in the bow."

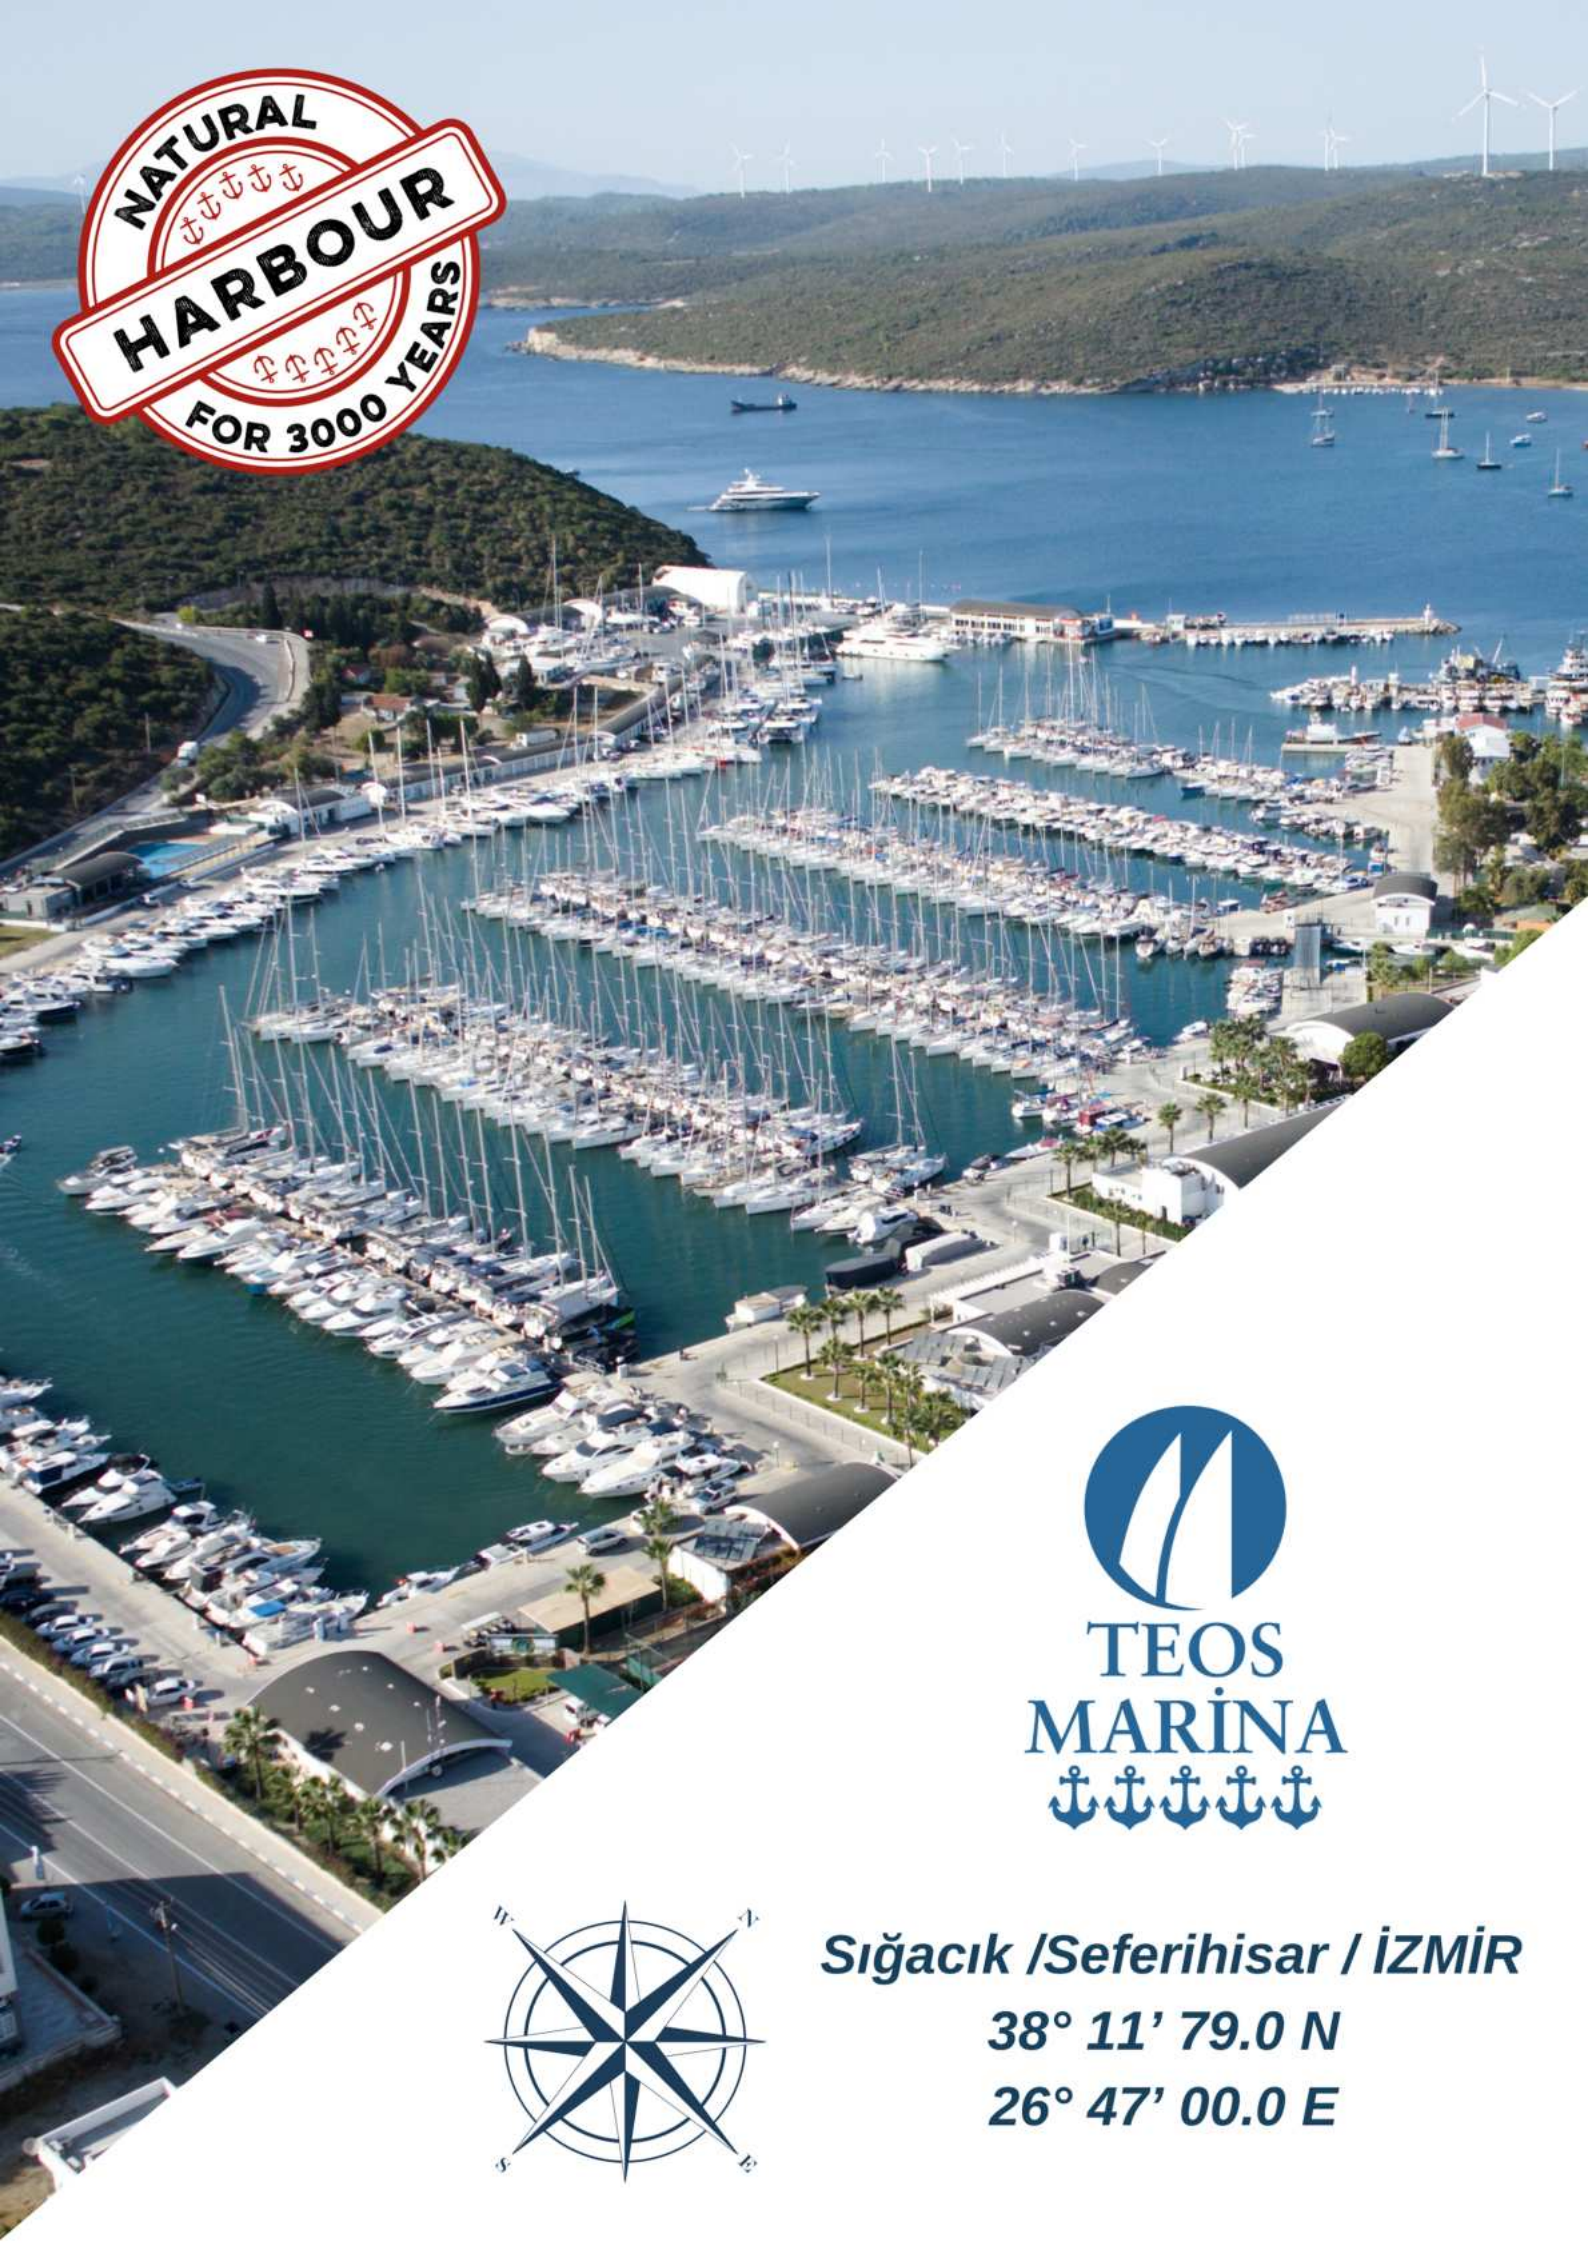

Santiago turned aft to tie off the tail. "It was so big it was like it was carrying a bigger boat with it."

Biologists today believe that the Marlin that Santiago caught in the story is the blue marlin (*Makaira nigricans*), a fish with a subpopulation in the Atlantic and a worldwide distribution in tropical oceans. Current research shows that almost every Blue Marlin over a few hundred kilos is female.

The largest Blue Marlin ever caught by a sport fisherman weighed over 635kg and was caught off Brazil in 1992. Hemingway also had many records for catching Marlin in the Gulf Stream.

For Santiago, and probably Ernest Hemingway, the blue marlin is among the ocean's most majestic animals. In the novel, the old man is conflicted about catching these fish for people to eat. And one night, as the giant marlin lures it deep into the Gulf Stream, as he clings to the line, Santiago says aloud, "Fish is my friend too. I have neither seen nor heard of such a fish. But I must kill him. "I'm glad we don't have to try to kill the stars."
